EDUCATION

Facultad de Ingeniería del Ejército 2024 - Present
Computer Engineering (in progress)
Studies in programming, databases, algorithms, data structures and computer architecture.

Instituto San Roman 2018 - 2023
Secondary School Diploma · Natural Sciences

TECHNICAL PROJECTS

secureGate Repository 2026
Academic project · Frontend contributor | Python, FastAPI, Jinja2, HTMX, SQLite

- Contributed to the frontend of a facial recognition and RFID access system, including user administration, event history and CSV reports.
- Collaborated on integration with a protected REST API; the team presented a working prototype in Communications Systems 1.

Personal portfolio Website 2026
Personal project · Published | Next.js, TypeScript, Supabase, Docker

- Developed a bilingual, mobile-responsive portfolio with a 3D laptop and an editing dashboard backed by authentication and persistent data.
- Deployed the application on a personal server using Docker and Cloudflare Tunnel; integrated Supabase and contact emails through Resend.

Cliped 2026
Personal project · In development | React, TypeScript, Python, FastAPI, OpenVINO

- Developed a local MVP to analyze football videos, select a player from visual profiles and export player tracking with audio.
- Integrated a React interface with a Python backend, FastAPI and computer vision models; identity consistency and performance remain under validation.

WORK EXPERIENCE

ZARA May 2025 - Feb 2026
Sales Associate · Part-time

- Advised customers and handled in-store sales; supported stock replenishment and product presentation.

Maxdream Dec 2023 - May 2025
Sales Representative · Part-time

- Sold graduation travel packages, advised customers on destinations and travel conditions, and followed up on enquiries.

Air Europa Aug 2023 - Nov 2023
Administrative Assistant · Internship

- Organized documentation and supported administrative tasks in the operations department during an internship.

SKILLS AND LANGUAGES

Programming: C++, Java; Python and TypeScript used in projects.
Web and data: React, Next.js, FastAPI, HTMX, SQLite and PostgreSQL through Supabase.
Foundations: Algorithms, data structures and computer architecture.
Tools: GitHub, Visual Studio, JetBrains, Codex; Docker and Linux on a personal server.
Languages: Native Spanish; English B2, Cambridge English: B2 First certified.
Activities and interests: Attended CyberAR. Interests in artificial intelligence and cybersecurity.
